The Power to Empower Insurance Companies

Pointer Stolen Vehicle Recovery (SVR) System Ensures:

- Highest Recovery Rate
- Fast Recovery
- Least Possible Damage
- Reduced Theft Probability

POINTER

Stolen Vehicles: An Ever Increasing Problem

It's true. The rate of stolen vehicles is increasing worldwide. Thieves are becoming more adept at their trade. It's also true that a smart Stolen Vehicle Recovery (SVR) system can significantly impair the capabilities of car thieves.

Pointer: Providing Insurance Companies with THE SVR Solution

Pointer – a leading global provider of SVR systems – understands the needs of insurance companies and empowers them by providing all-inclusive systems that significantly reduce car theft risk, and in turn save money. A company with a proven track record, Pointer is committed to the highest Quality of Service (QoS) standards.

Pointer SVR System: The Market's Highest Recovery Rate

Pointer SVR's recovery rate is the highest on the market. This achievement is due to a sophisticated system combining over a decade of SVR experience with a proprietary technology answering every aspect of car theft. At the same time, an optional immobilizer and matching alarm system form the best brand solution for reducing car theft probability.

The Fast & Sure Track for Rapid Recovery of Stolen Vehicles

A sophisticated system, Pointer SVR enables speedy recovery with the least possible damage. The network is composed of the following elements:

- AVL End Unit - Cellocator's best of breed units with attached GPS devices possessing superior location capabilities, enabling instant nation-wide coverage with high-level services.
- Command & Control Center - A state of the art technology with unique capabilities that enable receiving and analyzing all events in real-time, and guiding chasing forces toward the stolen vehicle. This cost-effective technology constitutes the formula for high success retrieval rates.

An Advanced System at your Service 24/7

With Pointer SVR, extensive customer support is available through dedicated resources on a 24/7 basis, with a call center handling multiple recovery events and an advanced CRM system for managing and handling all customer relations. Equipped with redundancy measures, Pointer SVR guarantees the best possible service. Finally, an advanced API enables connectivity to 3rd party applications and legacy systems.
